

MY FAVOURITE ANIMAL- PANGOLINS

1F (35) WONG TZE LOK ETHAN

I love pangolins. They are sandy brown. They have got scales and long tails. They like to eat ants and termites. They can roll into a ball and dig deep burrows. They have four fingers, but they don't have teeth. They swallow the insects whole. They can eat up to 200,000 insects in a day. I love pangolins very much.
